

Professional Summary

- Full Stack / Front-End Engineer with 9 years of experience building and maintaining scalable web applications.
- Strong expertise in modern front-end technologies including React, JavaScript, HTML5, and CSS3.
- Solid experience across the SDLC, including design, development, testing, deployment, and maintenance using Java, Spring Boot, RESTful APIs, PostgreSQL, and Cassandra.
- Hands-on experience working in Agile, cross-functional development teams.
- Experience leveraging AI-assisted development tools (e.g., GitHub Copilot, LLM-based tools) to improve development efficiency and code quality.
- Familiar with Large Language Models (LLMs), prompt engineering, and AI application workflows, including integration of AI-driven features into web applications.

Skills

- Front-End: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Redux, jQuery, SCSS/SASS
- Back-End: Java, Python, Spring Boot, RESTful APIs, PostgreSQL, Cassandra, Kafka
- Testing & Quality: Unit Testing, Integration Testing, Jest, React Testing Library, Mockito,
- Tools & Platforms: GitHub, Jira, Rally, Postman, Figma, VS Code, IntelliJ IDEA, GitHub Copilot
- Other: Agile, SDLC, RESTful Architecture, Clean Code, Performance Optimization

Professional Experience

Full Stack Developer

Synechron – Sunrise, FL | Client: American Express (GenAI Team)

05/2024 - present

- Developed responsive and high-performance user interfaces using HTML, CSS, and JavaScript.
- Built scalable React applications using Redux and React Hooks for state management.
- Designed and implemented RESTful APIs and database schemas to support frontend features.
- Wrote comprehensive unit tests, achieving 100% code coverage and improving system stability.
- Independently handled end-to-end development including design, implementation, testing, and deployment.
- Leveraged AI-assisted coding tools (e.g., GitHub Copilot, LLM-based assistants like GPT and Claude) to accelerate development, refactor code, and improve productivity.
- Collaborated on AI-driven application features, supporting integration with LLM-based services and understanding end-to-end AI workflows (prompting, API interaction, response handling).
- Applied prompt engineering techniques to generate code snippets, debug issues, and optimize UI development workflows.

Front End Engineer

Lab49 – New York, NY | Client: Goldman Sachs

07/2021 - 03/2023

- Developed and maintained front-end applications using React, TypeScript, HTML, and CSS.
- Created shared CSS/SCSS standards to ensure consistent UI across the team.
- Developed reusable components and validation logic using regular expressions.
- Collaborated closely with designers, product managers, and developers in Agile ceremonies.

Front End Developer

Norcapco Integrated Solutions, Inc – NJ | Client: The Game Agency

02/2016 - 07/2021

- Developed responsive web applications using HTML, CSS, JavaScript, and jQuery.
- Implemented front-end logic and integrated with backend services via AJAX and REST APIs.
- Applied responsive design principles using media queries.
- Maintained and enhanced existing UI components and application features.

Front End Engineer

Technomax, LLC – NJ | Client: ADP, LLC – Roseland, New Jersey

03/2015 - 10/2015

- Developed UI components using HTML, CSS, JavaScript, Bootstrap, and AngularJS.
- Integrated front-end components with backend services using RESTful APIs.
- Contributed to design, development, testing, and maintenance of enterprise applications.

Education

Master of Science: Computer Science | Stevens Institute of Technology | Hoboken, NJ, 2014

GPA: 3.7/4.0

Bachelor of Science: Automatic Control | Beijing Institute of Technology | Beijing, China, 2012

GPA: 3.4/4.0
